	Examiner Deborah Yee	Art Unit 1742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 to 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawrence et al (US Patent 5948353).

3. Lawrence on lines 25 to 51 of column 2 discloses a gray cast iron alloy having a composition with constituents whose wt% ranges overlap those recited by claims 1 to 37; such overlap renders applicant's composition prima facie obvious because it would be obvious to one of ordinary skill in the art to select the claimed alloy ranges from the broader disclosure of the prior art since the prior art has the same utility (brake drum) and similar properties of high strength and wear resistance. See MPEP 2144.05.

4. Moreover, even though prior art does not teach Type A flake graphite and carbon equivalent of 4.1 to 4.25% as recited by one or more of the claims, such would be expected since the compositional limitations are closely met and in absence of proof to the contrary.

5. Although Lawrence preferably teaches 0.2 to 0.5%Cr, its broad teaching does not include Cr and hence would meet applicants' dependent claims reciting less than 0.5%Cr. Furthermore, Lawrence does not teach Mg and therefore would be present at

impurity levels similar to less than 0.005% or less than 0.001% Mg recited by applicants dependent claims.

6. Applicants' claims 19 and 34 to 37 recite a specific gray iron alloy composition that falls within the broad alloy wt% ranges of the Lawrence alloy. Hence claims would not patentably distinguish over prior art.

7. The unapplied references have been cited to further depict the state of the art in grey cast iron alloys.

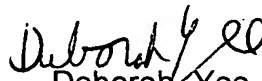

8. In applicant's specification on page 14, Table 1 list comparative test materials without disclosing the compositions. It is requested by examiner that applicant provide the compositions to gain a better understanding of the test data.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah Yee whose telephone number is 571-272-1253. The examiner can normally be reached on Monday-Friday from 6:00 to 2:30.
